

# Project Management Professional

## PMP Certification Training

### **Participants**

Practicing Managers and aspiring Project Managers with three years of relevant work experience.

### **Objectives**

Prepare for PMP Certification, the most sought after and globally recognized credential issued by the Project Management Institute (PMI ®).

Gain in-depth understanding of global best practices in Project Management.

## About PMP Certification

Project Management Professional (PMP) Certificate is issued by Project Management Institute (PMI®), on recognition of adequate knowledge possessed by an experienced practitioner evaluated on the basis of rigorous examination. Project Management, having grown to the status of a major managerial discipline, it is imperative that the practitioners of project management undergo regular training on the globally accepted best practices and get themselves certified to demonstrate their competency to pursue the profession.

PMP certification has significant value for individuals, organizations, customers, professional societies, the project management community and the public. Each gains when project leadership is nurtured and project management methodologies are established and administered to assist the professional growth of practising managers. The cost as well as the effort expended on certification by the individuals and organizations is more than returned through quality workmanship, more informed decisions, and capability for better, faster, less expensive products and services.

## Benefits to Employers

- It provides a benchmark for the recruitment, training and development of project management staff.
- It provides a marketing tool by demonstrating the company's commitment to excellence in project management and the competence of its staff at managing projects.
- It helps significantly, in addition to employee technical qualifications, to provide confidence to clients that the company can handle their business efficiently and cost effectively.

## Benefits to Employees

- It provides peer recognition of one's competence.
- It complements and enhances other technical or business qualifications by demonstrating that an individual is also competent in the crucial ability to manage projects.
- It assists in the recognition of the transferability of an individual's skills from one company or industry to another.
- Through participation in the certification process, individuals enhance their confidence in their project management and general business knowledge.
